Education

Northeastern University , Boston, MA <i>Master of Science in Urban Informatics</i> Relevant Coursework: Big Data for Cities, Machine Learning, Data Visualization GIS for Urban Planning, Computational Statistics, Urban Theory	Dec 2024 GPA: 3.96
Northeastern University , Boston, MA <i>Graduated Cum Laude with a Bachelor of Science in Business Administration and Computer Science</i>	May 2021

Technical Skills

Languages:	<i>Experienced:</i> R, Python, SQL <i>Familiar:</i> C++, Javascript, CSS, HTML, Java
Software:	ArcGIS, QGIS, R Studio, Microsoft Excel (Advanced), Microsoft Office, Jupyter, Snowflake, Power BI, Tableau, Visual Studio Code, Git, MySQL

Experience

City of Boston , Boston, MA <i>Senior Evaluation and Research Fellow</i>	Sep 2025 – Present
• Manage and mentor a Junior Fellow with regular check-ins to assist with any roadblocks and delegate new tasks. • Design and administer a ranked-choice lottery system for the Boston Family Days program to fairly distribute over 1,000 free performing arts tickets to families for several local shows every month. • Develop an internal Boston Economic Report that can fetch and format data from many sources by running a single script to present a timely and nuanced view of the local economy in a national context. • Collaborate closely with multiple internal stakeholders to design questions for the Boston Community Survey to better understand how their departments can better meet the needs of constituents. • Create a standardized data pipeline to quickly generate tailored reports for various stakeholders with relevant results from the Boston Community Survey. • Produce several ad-hoc reports and analyses to assist with time-sensitive projects and decisions such as forecasting SNAP recipients to estimate the potential impact of lost benefits on a city and neighborhood scale.	
Boston Area Research Initiative (BARI) , Boston, MA <i>Research Assistant</i>	Jan 2024 – Dec 2024
• Lead development and maintenance of code base to assess local disparities in climate resilience and identify drivers and policy levers. • Created multi-level models to examine the impact of local and regional factors on heat and air pollution. • Developed method for approximating street width using structure data to categorize the air flushing regime and estimate air pollution exposure risk.	
Protiviti , Boston, MA <i>Technical Consultant</i>	Aug 2021 – Dec 2022
• Designed a full suite of customer metric dashboards in Power BI to explore tabular data and visualizations that were used to help identify trends in customer behavior. • Developed several applications using VBA for Excel to accept and process input from business users that would then enter an ETL pipeline.	
Benefits Science Technologies , Boston, MA <i>Technical Consultant</i>	Jul 2020 – Dec 2020
• Diagnosed and resolved production issues on clients' Tableau pages to cater to specific data needs. • Developed reports for account managers about status of issues and delegated fixes to other teams when necessary. • Prepared and coordinated monthly release rollout to all clients and recorded any errors to be addressed later.	

Interests and Activities

- I love to play video games and cook with my wife.
- I'm very passionate about urban design and transportation and love learning about its history, present, and future.
